About This Game

The Mystery of a Lost Planet - Space Hidden Objects Game

A game that makes You use your brain.

We tried to break from the standard formula most hidden object games follow these days, which is "Your father/brother/husband/sister/daughter/son has been kidnapped/put under a spell/otherwise crapped on by a witch/sorcerer/mad scientist/evil stepmother/generic evil doer and it's your job to save them."

The crew of a marooned spaceship must uncover the secrets of an unknown planet to survive. After a crash landing on the lost planet, you're left with many unanswered questions. What was the mysterious force that seems to have pulled your ship into the planet and what are its intentions? The journey to answer these questions will be challenging but you cannot give up, because if you fail the crew will never see their home planet again!

Explore beautiful landscapes on your journey - visit the islands that float in the air, underwater worlds and alien jungles. Traverse mysterious caves and damaged spaceships to learn more about this world's amazing inhabitants.

Small Bonus! Play the game on hard to meet a survivor of a previous spaceship crash and learn about his extraordinary survival story.

Features:

- Explore more than 50 bright and colorful locations
- Complete many original quests and puzzles
- Pleasant and atmospheric music
- Interact with a variety of characters

Asinine game design:

Complete all level objectives, including obtaining \$2000 and reducing global trace level below 50%. Continue playing. Accrue more than \$5000 and spend money on huge firewall upgrade. Use large trace level buffer to hack hidden (bonus) servers. Exhaust all options on this level and attempt to progress to next; cannot. Hit F2 and review level objectives again. Objectives for obtaining money and reducing trace level are now marked incomplete. Cannot progress because elected to spend acquired resources on better equipment and use low trace level for server exploration. Punished for playing too well. Refuse to replay 30-minute level; uninstall.

Play Street Hacker and mess around with mods for Uplink instead. Please someone make a truly amazing new hacking game.. Neighboring Islands. This is the first novel in which I decided to play and you know, I was hooked. Pirates, rum, ship and many puzzles that you have to solve. With each episode you are absorbed in this game.

Approved. This game has a quite pleasant atmosphere and interesting movement mechanic. As for me personally, this game is quite enjoyable time killer. Without much hesitation, in brief... I recommend this game.. This game is so f*cking sh*t. There's honestly no potential, this game is garbage. Your life is actually f*cking sad if you play this sh*tty game. Worst 40 minutes of my life, Ubisoft games are *ss. Why the f*ck do we need to make an account, before you release a game make sure it has basic f*cking features. (until I get another sh*tty game like this!). Probably one of the greatest games ever created. Antonio Renna, the absolute genius behind Gabe Newell Simulator 2.0 has done it yet again. With breathtaking visuals, innovative map design, flawless mechanics and an absolutely outstanding sound track this game is certainly a contender for a gaming BAFTA.

10/10. This game looked cool, but unfortunately poor level design generally prevents it from being very fun. The mechanics of this game are extremely limited (you have jump, double jump, and shoot, and that's it), and the levels themselves are also very linear and filled with pixel perfect jumps and cheesy instant kills. This generally means there's only one way to handle any given situation, which causes the game to feel repetitive and eliminates any potential for skillful play. On top of this, the enemies in the game also generally take way too many shots, which also makes the game feel fairly slow-paced and button-mashy.

This game tries to be a throwback to Gameboy Color, but it possesses no interesting mechanics and would be a fairly mediocre game even if it had been released on that system (comparing this to, say, the GBC Goemon game really drives this point home). It's a shame, too, because the game does possess moments where you can see there was some potential (for example, during the boss fights, which actually allow some degree of freedom and are generally the highlight of the game), but these moments are few and far between.. Amazing game. I've played and finished Larry 1-7 back at the time and I can safely say even without the nostalgia factor Wet Dreams is fun to play both puzzles-wise and story-wise. While it's completely true to the spirit of the original series, it's also a very fresh take. I can safely call this Larry 8 even though Al Lowe isn't involved..

It's a tough as nails shmup done in the aesthetics of R-Type (ZX Spectrum version). It has tons of little short levels that make you swear (in a good way). You will die a lot, but each and every level is achievable. One for the retro fans, for sure, but shmup fans should give this a chance beyond a cursory glance. It has some really great levels.. This looked like comfy game so I decided to pick it up.

Visuals are fantastic for its time, music is great and the core play is consistent and engaging.. I recommend this game only IF you love being challenged, this type of game doesnt have controls tight enough but for amount of precise platforming it has later on. Still its very pretty, and going fast thru the levels is super fun, although some levels are bland or just go on forever. good game if u like cossacks. This game is broken dont buy it!. The Hotline Miami of pizza delivery. Kind of a one trick pony. I would not pay more than \$2 for it, but it is a fun and ridiculous arcade experience. Mix bullethell and Crazy Taxi with the terror that is the Australian Suburbs and you get World's Fastest Pizza. Race around random neighborhoods during "happy hour" dodging gunfire and explosions, being chased by a rabid dog, to deliver the hottest pies in town, then sneak into a dungeon and follow the blood trails to deliver a last-meal to those being held there - leave them to enjoy their pizzas and get out, then drop off your last meatlovers to a peaceful, sober man in the quietest neighborhood in Sydney. A truly absurd game.. Looks like the game is dead.. Really good game. About everything is done perfectly my only complaints would be minor ones like the fact that there's no key mapping and imo crouching with C is kinda awkward it's also possible to be stuck randomly (mostly in the underground part). It's sadly a bit too short for my liking but otherwise it's really good.

So yeah, would recommend.. Discover the world of microbes. Help them splice to find the right form. It's another unique puzzle game with an awesome soundtrack that will help you enjoy some hours.
